E-commerce Sales Analysis

Data Analyst Project

by Maria Giselle González Hermosilla

The objective of this project is to analyze sales data to identify patterns, trends and business opportunities.

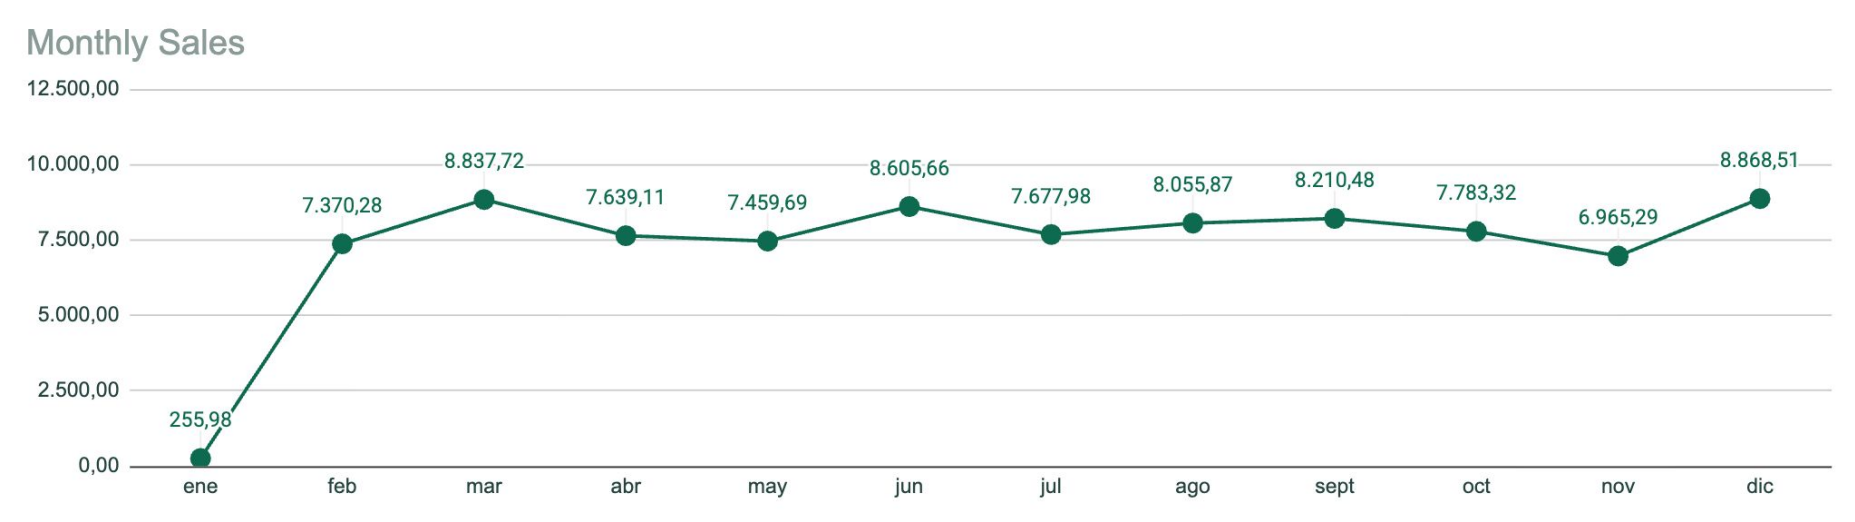
The dataset includes sales, customers, products, and payment methods.

KPIs

Total Revenue $87.729,89	Total Transactions 2.523	Average Order Value $34,77	Cancellation Rate 0,40%
Pending Sales $14.985,96	Revenue Opportunity $102.715,85	%Top Products 28,46%	% Top Customers 6,93%

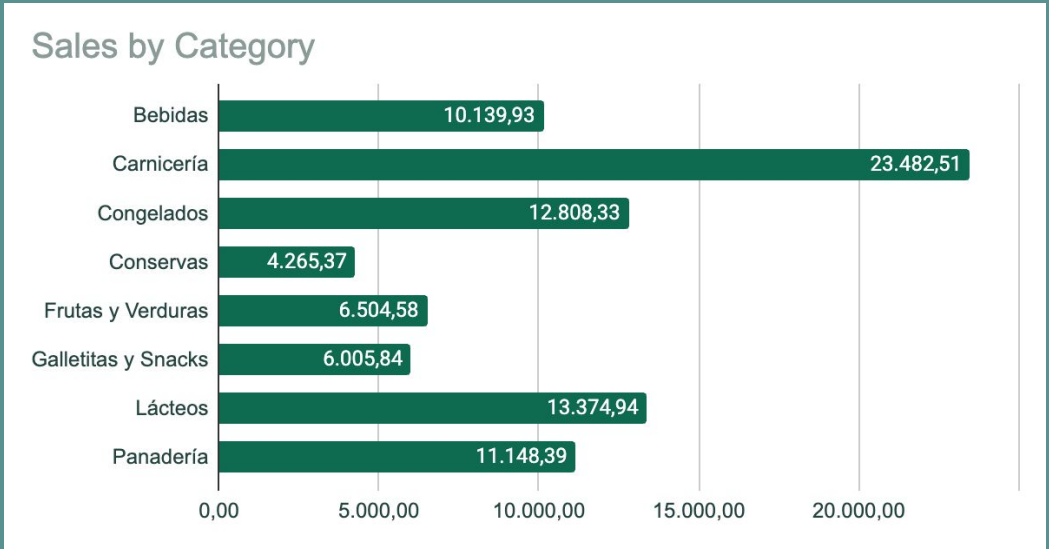
SALES

Sales remain stable throughout the year, with no strong seasonality patterns.



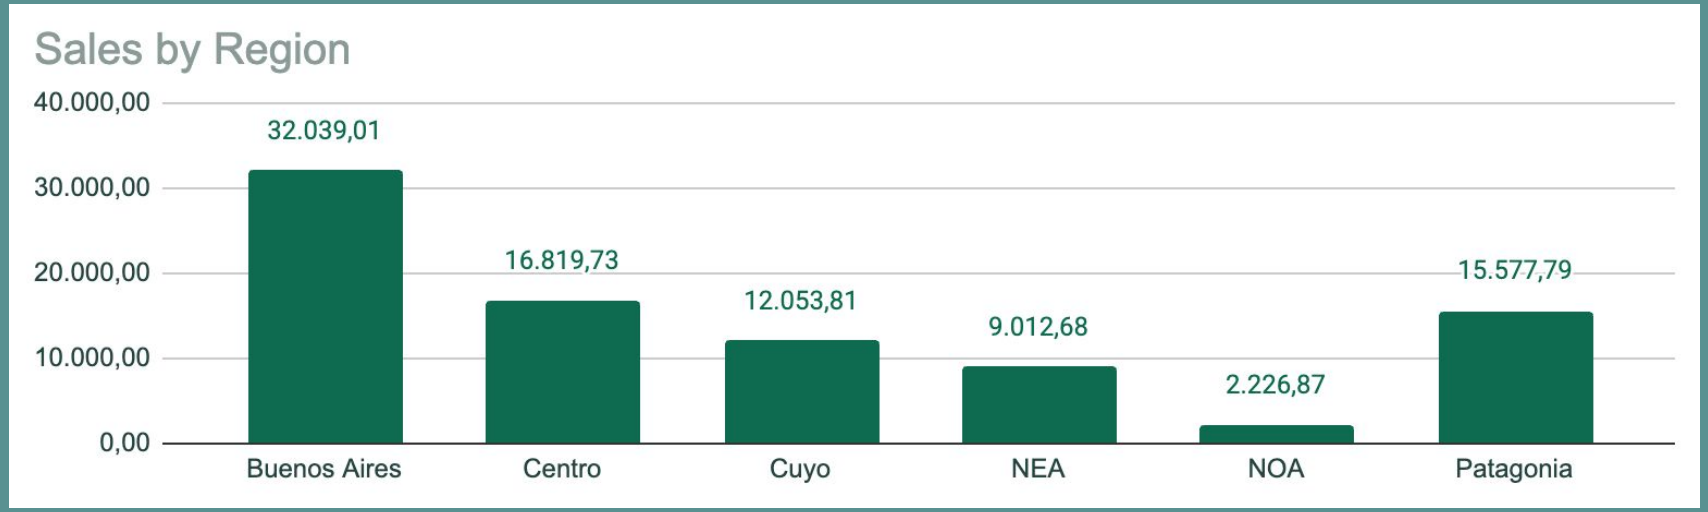
SALES BY CATEGORY

Revenue is concentrated in a few key categories.



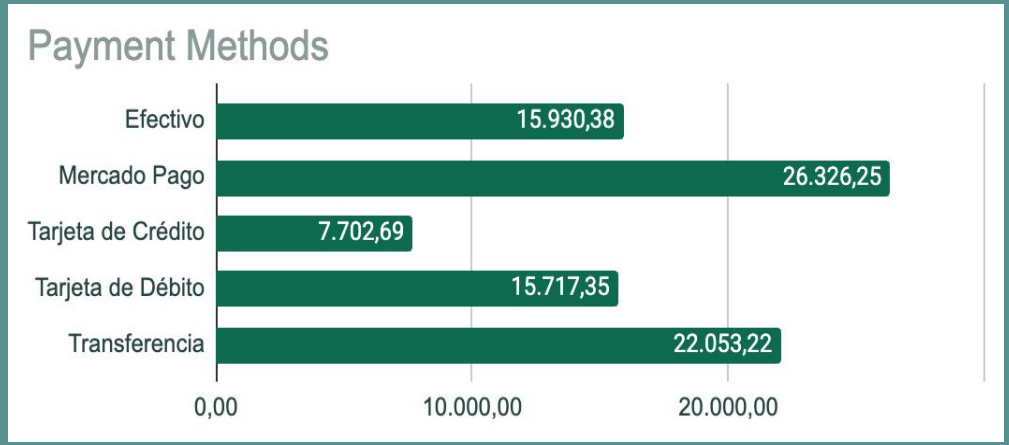
SALES BY REGION

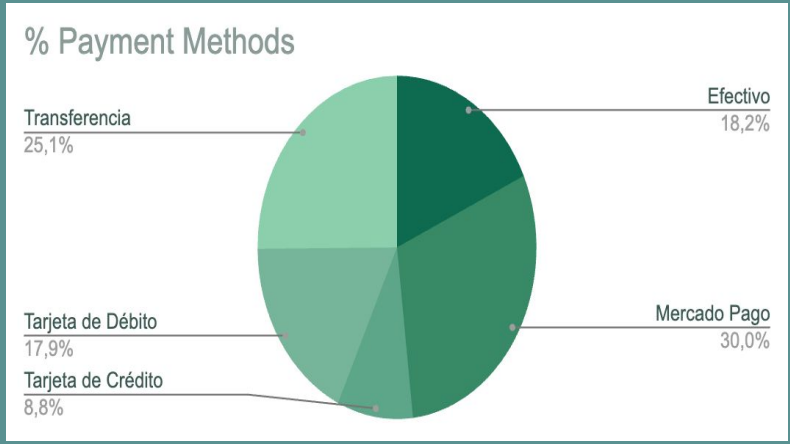
Sales are heavily concentrated in Buenos Aires, with lower performance in other regions, indicating potential for geographic expansion.



SALES BY PAYMENT METHODS

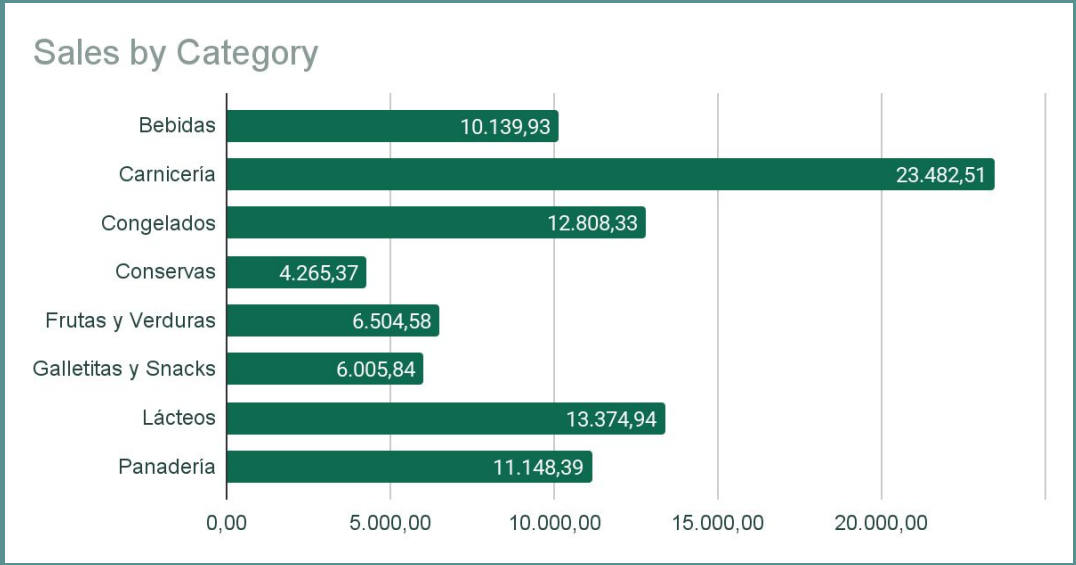
Digital payments dominate customer transactions.





TOP 5 PRODUCTS

A small number of products drives a large share of revenue.



Insights

- Stable sales over time.
- Revenue concentration.
- Strong digital payment adoption.
- Low cancellation rate.

Recommendations

- Focus on top-performing products.
- Increase conversion of pending sales.
- Strengthen digital payment channels.

The business shows stable performance with opportunities to grow through better conversion and products focus.
